## Features of SnapStone Floating Porcelain Tile Flooring System

### High Quality Porcelain Tile

- Easy to maintain
- Scratch, Stain and Moisture resistant
- Allergen-resistant
- Incredible durability
- Adds value to your home
- Many beautiful designs to choose from

### The SnapSys Interloc® Tray

- Allows tile to quickly and easily "snap" together
- Self-aligning system ensures consistent grout lines
- Eliminates need for spacers and grids
- Tiles can be disassembled and reused
- Minimizes sound transmission, making it perfect for apartments or condominiums

### Rubberized Base

- Absorbs minor imperfections in the sub-floor eliminating the need for underlayment
- Allows tiles to "float" directly over vinyl, wood, concrete or ceramic without adhesive or mortar
- Skid-resistant

## SnapStone and the Environment—It's Green!

### Sustainability

SnapStone tile can be disassembled and re-used, making it one of the only reusable tiles available today! Reusable means sustainable!

### Less Waste:

- Fewer natural resources consumed compared to traditional tile: 2-3 core products vs. 5 – 8 core products
- No discarding of existing floor and dumping into landfills, SnapStone installs over it

### Healthier Air:

- No dust generated from mixing adhesives, grout and thin sets
- No dust generated removing old floors
- Tile is easy to clean and inherently hygienic vs. carpets/rugs

### Life Cycle:

Life cycle maintenance costs for SnapStone are significantly lower than traditionally installed tile because it is not adhered to the floor and is easy to remove
